# Order-Map-Treat Program

## Podcast:

Hear Dr. Kokabi discuss how he utilizes the Order-Map-Treat Program to treat his patients quickly and effectively

### Nima Kokabi, MD, FRCP

Nima Kokabi, MD  
Associate Professor of Radiology  
Vice Chair of Clinical Research  
Interventional Oncology Director  
Cancer Imaging Director  
UNC School of Medicine  
Chapel Hill, NC, USA

“ Now that there are all different calibrations available at all different days of the week, it actually gave us all types of flexibility on the types of tumors we can treat and the patients we can fit into our schedule. ”

“ By doing the treatment the same day (as mapping), you leave the vascular sheath in place and basically minimize the trauma because of the single access that you have. You are able to simulate the exact scenario that you did with your mapping. ”

“ That is one of the advantages of the FLEXdose Delivery Program. You order a vial and you can split it as many times as you want and that gives you a lot of flexibility for patients that may have more complex tumors. For example, if you have two feeders or need to do two segments at the same time on the same treatment day, you can draw the amount of activity to achieve the dose you want. ”

**Caution:** Federal (USA) law restricts this device to sale by or on the order of a physician. Indications for Use: SIR-Spheres Y-90 resin microspheres are indicated for the treatment of unresectable metastatic liver tumors from primary colorectal cancer with adjuvant intrahepatic artery chemotherapy (IHAC) of FUDR (Floxuridine). **Consult the Instructions for Use ([www.sirtex.com](http://www.sirtex.com)) for a complete listing of indications, contraindications, side effects, warnings, and precautions.**
